

## Example A

Hideyo Noguchi was a doctor  studied bacteria. Many sick people were saved by his work.

Noguchi was born in Fukushima in 1876. He burned his left hand when he was a baby. His friends teased him at school. He studied very hard. He became a famous doctor and went to America in 1900. In 1918 he went to Africa. He studied yellow fever there. He got the sick and died in Africa in 1928.

Now we can see his face on the 1000 yen-bill. I think he was a great doctor  worked very hard for sick people.

## Example B

We can see Hideyo Noguchi's face on the 1000 yen-bill. He was a doctor  studied bacteria. Many sick people were saved by his work.

Noguchi was born in Fukushima in 1876. He burned his left hand when he was a baby. His friends teased him at school, so he studied very hard. Then he became a famous doctor and went to America in 1900. In 1918 he went to Africa to study yellow fever. While he was studying, he got the sick and died there in 1928.

I think he was a great doctor  worked very hard for sick people.
